Date: 13 March 63

25X1A

TO: Chairman, Equipment Board

FROM: [REDACTED] OC-0

SUBJECT: 6 March 1963 Equipment Board Agenda

Agenda Item No. 1: Procurement of 100 RR-48B (10 - 20 mcs) and 50 RR-48A (3.5 - 12 mcs) Receivers

RR-48B Background: Almost all RR-D/11 receivers are committed to existing requirements and production models of the RR-49 receiver will probably not be available for another 12 months. Thus, no modern receiver is available for coverage above 12 mcs. To tide the Office over until the RR-49 becomes available, OC-08 recommends that 100 RR-48B receivers be procured at the laboratory. Cost of labor and parts for each receiver are estimated at \$125.00.

Required Action: Approve or disapprove the procurement of 100 RR-48B Receivers.

Member Action: Approve (☒) Disapprove (☐)

Member Comments:

I assume/hope the quantity is sufficient to tide us over.
J.

RR-48A Background: Twenty-five RR-48 receivers have been produced by the OC Laboratory and 75 RR-48A receivers are now in production with delivery expected in March. In view of the shortage of tuneable receivers, OC-08 recommends that an additional 50 RR-48A receivers be produced by the OC Laboratory. Cost of labor and parts for each receiver are estimated at \$125.00.

Required Action: Approve or disapprove the procurement of 100 RR-48A Receivers.

Member Action: Approve (☒) Disapprove (☐)

Member Comments:

Same as above!
